

Simple Gems and Items Ultimate Animated Customizable Pack

Hello and thank you for checking out my assets. I hope you find a good use for them.

Attach the SimpleGemsAnim script to the game object and adjust parameters until you have the desired rotation, float and, scaling.

Is Rotating - Select this to indicate your item should rotate.

Rotate X - Select this if you want to rotate on the X axis.

Rotate Y - Select this if you want to rotate on the Y axis.

Rotate Z - Select this if you want to rotate on the Z axis.

Rotation Speed - Higher number for faster rotation.

Is Floating - Select this to indicate your item should float / hover.

Float Height - Increase number to float higher.

Use Easing for Floating - Will use an ease in and out for the animation.

Float Speed - Higher number for faster float animation.

StartScale - The scale that your game object is at the beginning of the animation (This should be it's start scale in most cases).

End Scale - The scale that the game object will animate to, then return to the start scale.

Is Scaling - Select this to indicate that the object should scale.

Scale Lerp Speed - Higher number for faster scaling.

If you feel like supporting me you can just leave a review on the asset, or follow one of my socials.

If there is anything I can help you with please do not hesitate to contact me on Discord, one of my socials or at Bentlman1981@gmail.com.

You may use these in commercial projects.

If you do use these in a game or something please share it with me or @ me somewhere with screenshots or a download link so that I can see it and share it with my friends and community =)
